CAREER OBJECTIVE

Full Stack Developer skilled in **React, JavaScript,** Node.js, Express**, and** MongoDB. I enjoy building **fast,** user-friendly**,** and scalable web applications using clean and efficient code. Seeking an opportunity to grow as a Full Stack Developer and contribute to a dynamic engineering team while enhancing my skills in both frontend and backend development.

TECHNICAL & SOFT SKILLS

Expertise: JavaScript, ES6, React.js, Firebase, Tailwind, Html5, Css5
Familiar: Node.js, Express.js, MongoDB, JWT, Axios, React Query
Tools: GitHub, npm, VS Code, Netlify, Vercel PROJECTS
Soft Skills: Team Management, Time Management,Communication

Project

Household services (November 2025- November 20225) Live | Server | Client

Explore a variety of services through a clean and user-friendly interface with smooth navigation and dynamic content interaction. Faced challenges with MongoDB schemas, ExpressJS routing, Netlify deployment, and integrating fetch-based APIs, which were resolved through hands-on debugging, documentation, and online research. During the process, I strengthened my skills in React, Vite, Context API, and advanced state management techniques.

- **Service Listing & Details with Reviews:**Users can browse a dynamic list of services and view detailed information for each service, including title, description, category, and images. Each service detail page also includes a reviews section, where users can submit their ratings and written feedback. Other users can view these reviews to make informed decisions before booking a service.
- **Sort by Price**:Users can sort services by price (ascending or descending), making it easier to find services that fit their budget.
- **User Service Add/Edit/Delete:**Users can add new services, edit their added services, and delete them if needed, providing a personalized and interactive experience.
- **Tools**:React, Vite, React Router, Tailwind CSS, Context API, Fetch API, MongoDB, ExpressJS, React Hot Toast / SweetAlert, Netlify hosting.

Hero.io(October 2025- October 2025) Live | Client

This is a dynamic React application deployed on Netlify that allows users to explore a collection of apps through a clean and responsive interface. The project integrates **Chart.js** for visual representation of data, enhancing insights and user experience

- **Dynamic App Listing & Details:**Users can click on any app from the list to view its details page, including app rating and description.
- **Install & Installed Page with Rating Sort**:Users can install apps from the details page, and view all installed apps on a separate Installed Apps page. Installed apps can also be sorted by rating for easier selection.
- **Show All & Search:** Clicking “Show All” displays all apps, and users can search for specific apps by name.
- **Tools**:React, React Router,Tailwind CSS,Toastify.

Education & Certification

Computer Science & Technology(Expected 2028)
Narsingdi Polytechnic Institute
Narsingdi,Dhaka, Bangladesh
Duration**:** 2024 – 2028
Complete Web Development With Programming Hero

Language

Bangla (Native) | **English** (Conversational)
